

Square LED Flood Light for Outdoor Use

This LED light is suitable for illuminating building facades, plazas, gardens, and golf courses. It is also used in villas, parks, farms, and other outdoor locations.

Overview

Professional Outdoor LED Flood Lighting

This ultra-slim square LED flood light is engineered for durability and high performance in demanding outdoor environments. Featuring a high-quality die-casting aluminum housing, it offers excellent corrosion resistance and anti-cracking properties. With an IP65 rating and a wide operating temperature range, this fixture is a reliable solution for various commercial and industrial exterior lighting applications.
