Product Overview

High-Performance LED Wall Washer

This high-intensity LED floodlight is engineered for demanding outdoor environments, including building exteriors, stages, and plazas. It features an advanced thermal management system with convection fan cooling and intelligent temperature control to ensure stability and longevity. Designed with a focus on environmental safety, it emits no UV or mercury, providing a reliable and sustainable lighting solution for architectural and landscape applications.

Technical Specifications

Environmental Compliance

No UV • No Mercury • Eco-friendly

Available Power Ratings

100W, 200W, 300W

Thermal Management

Fan cooling convection with adjustable speed and intelligent temperature control

Features

Core Advantages

- High-intensity output with low power consumption
- Advanced circuit design for static electricity resistance
- Waterproof construction for outdoor durability
- Intelligent power reduction during overheating

Applications

Recommended Applications

- Billboards and advertising
- Industrial factories
- Hotels and building exteriors
- Landscape lighting
- Bars and clubs
- Bridges, stages, and plazas
