

Square Louvered Ceiling Light Fixture

This ceiling light fixture features a hydraulically molded steel base and a scratch-proof, corrosion-resistant plastic coating. Its louvered design optimizes light distribution and reduces glare, making it suitable for spaces requiring efficient and controlled lighting.

Product Overview

Professional Louvered Ceiling Lighting

This square louvered ceiling light fixture is engineered for optimal light diffusion and glare reduction in professional environments. Featuring a grid of intersecting blades, it ensures even illumination while maintaining a clean, modern aesthetic. Its durable metal construction makes it a reliable solution for both commercial and residential spaces requiring efficient, controlled lighting.

Technical Specifications

Fixture Shape	Square
Design Features	Louvered, Anti-Glare, Even Diffusion
Construction Material	Durable Metal

Application

Recommended Applications

- Commercial offices
- Residential spaces
- Areas requiring controlled lighting
