

Square Point Shovel with Wooden D-Grip Handle

This square point shovel is built for digging, scooping, and moving various materials. Its durable steel blade ensures strength and longevity, while the wooden handle with a D-grip provides comfortable and secure handling.

Product Overview

Professional Grade Square Point Shovel

This heavy-duty square point shovel is engineered for demanding digging, scooping, and material handling tasks. Constructed with a high-strength steel blade, it provides reliable performance and long-term durability in rigorous work environments. The design incorporates a natural wooden handle equipped with an ergonomic D-grip, ensuring superior control and comfort during extended use on construction or landscaping sites.

Key Features

Design Advantages

- Durable steel blade for maximum longevity
- Square point geometry for efficient scooping
- Ergonomic wooden handle for secure grip
- D-grip handle design to reduce hand fatigue

Ideal Applications

Gardening, Landscaping, Construction, Material Handling
