

Square Point Shovel with Wooden D-Grip Handle

This square point shovel is designed for digging, scooping, and moving materials. It features a durable steel blade with a wooden handle and D-grip for comfortable handling.

Product Overview

Built for Reliability and Comfort

This heavy-duty square point shovel is designed for efficient digging, scooping, and material handling across various industrial and landscaping applications. It features a robust steel blade with reinforced edges to ensure long-term durability under demanding site conditions. The inclusion of a sturdy wooden handle with an ergonomic D-grip allows for superior control and comfort during extended use.

Key Features

Primary Applications

Gardening, Landscaping, Construction, Material Handling

Technical Details

Blade Specifications

- Square point geometry
