

Stacked Stone Veneer Panel

This natural stacked stone veneer panel adds a textured surface to walls and architectural features. It is composed of individual stone pieces arranged in a staggered, layered pattern with color variations.

Product Overview

Natural Aesthetic and Ease of Installation

This natural stacked stone veneer panel is designed to add a sophisticated, textured surface to interior or exterior architectural features. Composed of multiple individual stone pieces in a staggered, layered pattern, it offers a rustic aesthetic with natural color variations ranging from grays to blues. The panelized format significantly accelerates installation time compared to laying individual stones, making it an efficient choice for professional projects.

Material & Composition

Material	Natural Stone (Slate/Sedimentary)
Visual Characteristics	Natural Texture, Staggered Pattern, Layered, Stratified

Installation & Usage

Key Benefit

Faster Installation

Typical Applications

- Wall Cladding
