

Stage Lighting Equipment Flight Case

This robust flight case is designed for transporting and protecting color changers and other stage lighting equipment. Constructed with heavy-duty materials, reinforced corners, and a custom-foam interior, it ensures maximum protection during transit.

Overview

Professional Protection for Stage Equipment

This robust flight case is engineered specifically for the secure transport and protection of colour changers and delicate stage lighting equipment. Featuring a custom-foam interior and reinforced construction, it provides maximum safety against impact during touring and transit. Designed for mobility and durability, it includes smooth-rolling casters and secure locking mechanisms, making it an essential solution for theaters, event production teams, and touring companies.

Construction & Design

Primary Application	Colour changer and stage lighting equipment transport
Durability Features	Heavy-duty materials, Reinforced corners, Custom-foam interior, Secure latches

Mobility & Handling

Mobility Features

- Smooth-rolling casters
- Durable carrying handle

Mobile Design	Yes
