

Stainless Steel Airport Luggage Trolley with Brake

This airport trolley is constructed from durable 304 stainless steel. It features a braking system and a spacious platform for handling multiple luggage pieces.

Product Overview

High-Capacity Airport Luggage Trolley

This stainless steel airport luggage trolley is engineered for durability and efficient material handling in high-traffic environments like terminals and transport hubs. With a robust 250kg weight capacity and an integrated braking system, it ensures both operational safety and reliable performance under heavy loads. Its ergonomic design includes a spacious basket and a stable multi-wheel configuration for smooth maneuvering.

Physical Dimensions

Detailed Measurements

Dimension	Size	Unit
Full Length	1050	mm
Full Width	650	mm
Full Height	1030	mm
Basket Length	560	mm
Basket Width	330	mm
Basket Height	160	mm
