

Stainless Steel Cellar Vessel

These stainless steel cellar vessels are designed for food and beverage applications. They feature durable construction and customizable options for size, fittings, and accessories.

Overview

Reliable Craft Brewing Solutions

Leveraging decades of experience in turnkey industrial brewery design and TIG welding, these cellar vessels are engineered for reliable performance in craft brewing environments. Each tank is custom-built to specific requirements, ensuring high-quality fermentation and storage capabilities. The focus on sanitary design and premium materials makes these vessels ideal for professional food and beverage applications.

Material & Construction

Raw Materials	JIS SUS304, ASTM 316L, Certified Stainless Steel
Welding Technique	Quality TIG welding with sanitary interior shapes
Surface Treatment	Interior fine sanitary polishing

Components

Sanitary Fittings

- Sanitary man-way
- Valves
- Various fittings
- Inlet/outlet piping
- Adjustable feet

Applications

Primary Applications

Fermentation • Storage • Liquid Processing • Breweries • Wineries

Experience & Quality

Manufacturing Expertise

30 Years

Brewery Design Experience

20 Years

TIG Welding Expertise

Logistics

Estimated Lead Time

Stage	Duration
Production (FOB China Port)	From 6 weeks
Shipping	2-5 weeks

Customization

Customizable Features

- Vessel size
- Fittings configuration
- Accessories
- Specific tank dimensions
