

Stainless Steel Electric Kettle with Color-Changing Indicator

This electric kettle features a stainless steel body and a concealed heating element for efficient boiling. It includes a water level indicator that changes color as the water heats, along with an automatic shut-off switch and boil-dry protection.

Overview

Modern Stainless Steel Electric Kettle

This durable stainless steel electric kettle is designed for efficiency and safety in both home and office environments. Featuring a unique color-changing water indicator, it provides visual feedback during the boiling process for added convenience. With integrated boil-dry protection and a 360-degree base, this kettle combines robust construction with user-friendly operation.
