

Stainless Steel Fastener Assortment

This collection features various sizes and configurations suitable for machinery, construction, and custom fabrication. The components, including U-bolts, clevis pins, and slotted brackets, are designed for secure and reliable connections.

Product Overview

Professional-Grade Fastener Assortment

This comprehensive assortment of precision-engineered metal components is designed for high-performance applications in machinery, construction, and custom fabrication. Manufactured from high-quality stainless steel, each piece offers exceptional durability and superior corrosion resistance for long-term reliability. The collection includes a versatile range of configurations, providing a complete solution for secure and robust connections across diverse industrial projects.

Material & Construction

Material	Stainless Steel
Key Benefits	Corrosion Resistant, High Durability, Precision Engineered

Components & Inventory

Included Components

- Threaded rods
- Nuts
- Bolts
- Washers
- Custom-shaped brackets
- U-bolts
- Clevis pins
- Slotted brackets

Applications

Suitable Applications

Machinery • Construction • Custom Fabrication
