

Stainless Steel Flange

This is a stainless steel flange. It is designed for industrial piping systems to ensure secure and leak-proof connections.

Product Overview

Industrial Stainless Steel Flange

This stainless steel flange is engineered for high-performance industrial piping systems. Featuring precision-machined construction and a highly reflective surface, it ensures a secure and reliable leak-proof connection. It is designed to meet the rigorous demands of professional piping infrastructure applications.

Technical Specifications

Surface Finish

Smooth • Reflective

Bolt Hole Pattern

4 holes

Material Composition

Stainless Steel, Corrosion Resistant

Applications

Industrial Applications

- Industrial Piping Systems
- Fluid Handling
- Chemical Processing
- Pressure Systems
