

Stainless Steel Garden Water Pump with Pressure Tank

Stainless steel garden pump with integrated pressure tank is suitable for supplying water to homes and gardens. It features a durable stainless steel construction and a pressure switch for automatic operation.

Overview

High-Efficiency Stainless Steel Garden Pump

This durable garden jet pump is engineered for reliable water transfer and consistent pressure delivery in domestic and irrigation settings. Featuring a robust stainless steel pump head and integrated pressure tank, it is designed specifically for clean water applications. With an adjustable power range of 600W to 1200W, it provides flexible performance to meet various water supply and pressure boosting requirements.

Technical Specifications

Power Range

600 W

Minimum Power

1200 W

Maximum Power

Application Compatibility

Clean Water Only

Construction Materials

Stainless Steel Pump Head, Stainless Steel Tank

Features

System Features

- Integrated pressure tank
- Automatic operation via pressure switch
- Integrated pressure gauge for monitoring
- Durable stainless steel construction

Recommended Applications

- Domestic water supply
- Garden irrigation
- Pressure boosting systems
