

Stainless Steel Gravity Feed Spray Gun Cup

This stainless steel gravity feed spray gun cup is designed for use with a variety of spray guns. The cup is equipped with a precise needle valve for accurate flow control, ensuring consistent and even spray patterns.

Product Overview

Professional Spray Gun Cup

This stainless steel gravity feed spray gun cup is engineered for professional painting and coating applications. Its durable construction ensures longevity, while the gravity feed design promotes efficient and consistent material flow. Equipped with a precise needle valve, it allows for accurate control, resulting in even spray patterns and high-quality finishes.

Technical Specifications

Material	Stainless Steel
Feed Type	Gravity Feed
Flow Control	Precise needle valve

Features

Key Features

- Durable stainless steel construction
- Gravity feed design for efficient flow
- Precise needle valve for accurate control
- Easy to clean and maintain

Applications

Suitable Applications	Professional Painting, Coating Applications
