

Stainless Steel Phillips Countersunk Self-Drilling Screws

These self-drilling screws have a Phillips countersunk head and are made from stainless steel. They are designed for drilling and fastening in one step, providing a flush finish.

Product Overview

Professional Self-Drilling Solutions

These stainless steel Phillips countersunk self-drilling screws are engineered for efficiency in metal fabrication and general assembly. The precision self-drilling tip eliminates the requirement for pre-drilling, significantly streamlining installation processes. With a countersunk head design, these fasteners ensure a clean, flush finish on every surface.
