Overview

Industrial Stainless Steel Pipe Fittings

These professional-grade stainless steel pipe fittings are designed for reliable fluid and gas handling in demanding industrial environments. Constructed from corrosion-resistant materials, these components ensure long-lasting durability and high-temperature performance. The product range covers a versatile selection of connectors, including unions, elbows, tees, and caps, designed for secure and leak-proof system integration.

Technical Specifications

Available Fitting Types

- Unions (Conical/Flat, M/F, B/W, F/F)
- Elbows (90°, 45°, Street)
- Tees & Reducing Tees
- Caps (Round, Hexagon Head)
- Couplings & Reducing Sockets
- Nipples (Hexagon, Hose, Reducing)
- Plugs (Square, Hexagon)
- Bushings
- Crosses

Connection Standards

Feature	Specification
Standard Size	3/4 inch
Thread Type	NPT (National Pipe Thread)
Seal Integrity	Precision-machined

Material Composition

316 Stainless Steel
