

Stainless Steel Pipe Fitting Assortment

This collection features elbows, couplings, tees, and other fittings. Constructed from stainless steel, they offer corrosion resistance and reliable connections for various piping needs.

Product Overview

Industrial Stainless Steel Fitting Assortment

This comprehensive collection of stainless steel fittings is engineered for reliability in diverse piping systems including plumbing, HVAC, and industrial infrastructure. The assortment includes a wide variety of connection types such as elbows, tees, unions, and couplings designed to ensure leak-proof and durable performance. Built from high-quality stainless steel grades, these components offer excellent corrosion resistance for demanding professional environments.

Technical Specifications

Available Types

- Elbow 90°
- Elbow 45°
- Street Elbow 90°
- Tee
- Reducing Tee
- Cross
- Union
- Plug
- Busing
- Nipple
- Cap
- Socket
- Coupling

Thread Standards

NPT • BSPP • BSPT • DIN2999

Pressure Rating

150 LBS

Pressure

Material Composition

304, 304L, 316, 316L
