

Stainless Steel Sanitary Fittings for Industrial Use

These stainless steel sanitary fittings are designed for various industrial applications. The collection includes elbows, tees, unions, and other specialized components, all crafted from durable stainless steel for corrosion resistance and longevity.

Product Overview

High-Performance Sanitary Solutions

These stainless steel sanitary fittings are engineered for demanding industrial environments where hygiene and purity are critical. Designed to withstand rigorous cleaning processes, they offer exceptional corrosion resistance and long-term durability. This versatile collection supports seamless integration into food processing, pharmaceutical, and chemical manufacturing systems.

Technical Specifications

Material	Stainless Steel
Suitable Industries	Food Processing, Pharmaceutical, Chemical Industry

Component Inventory

Available Components

- Elbows
- Tees
- Unions
- Specialized components

Product Identification

Standardized Product Codes

Series	Part Numbers
Series 2	p2-4, p2-5, p2-6
Series 3	p3-1, p3-2, p3-3, p3-4, p3-5, p3-6
