

Stainless Steel Sanitary Union Fitting

This sanitary union fitting features a smooth outline and is suitable for various applications. It provides a secure and hygienic connection in piping systems.

Product Overview

Professional Sanitary Union Fittings

These precision-engineered stainless steel sanitary union fittings are designed for secure, leak-proof connections in high-hygiene piping systems. Crafted from high-grade corrosion-resistant steel, they are suitable for demanding environments including pharmaceutical, beverage, and food processing facilities. The product range supports diverse industrial requirements with multiple size options and international standard compliance.

Technical Specifications

International Standards

ISO • DIN • IDF • SMS
