

Stainless Steel Shrouded Padlock with Round Disc

This high-security padlock features a round disc design and shrouded shackle. Constructed from stainless steel, it offers robust protection against tampering and forced entry.

Product Overview

High-Security Shrouded Padlock

This stainless steel round disc padlock is engineered for maximum security in demanding environments. Its unique shrouded shackle design significantly limits access to the shackle, providing robust protection against cutting tools and tampering. Featuring a precision cylinder mechanism, it offers enhanced pick resistance, making it an ideal choice for securing gates, storage units, and other high-value assets.
