

Stainless Steel Submersible Deep Well Water Pump

This submersible deep well water pump is designed for efficient water extraction. Constructed from durable stainless steel, it resists corrosion and ensures longevity.

Overview

High-Efficiency Stainless Steel Submersible Pump

This submersible deep well water pump is engineered for efficient water extraction in demanding environments. Constructed from durable stainless steel, it offers excellent corrosion resistance and long-term reliability for irrigation, domestic supply, and industrial applications. Its slim, multi-stage impeller design ensures high performance and consistent water flow even in narrow well casings.

Technical Features

Material	Stainless Steel
Model ID	100QJ3
Key Features	Corrosion Resistant, Multi-stage Impeller, Slim Design, Quiet Operation, Built-in Check Valve

Applications

Primary Applications

- Agricultural Irrigation
- Domestic Water Supply
- Industrial Water Extraction

Maintenance

Maintenance Requirement

Low Maintenance • Easy Installation
