

Stainless Steel Submersible Sump Pump

This submersible sump pump is made of stainless steel AISI 304. Its double mechanical seals ensure long life and reliability.

Product Overview

Robust Submersible Water Removal Solution

The OPS submersible pump is a durable and efficient solution designed for effective water removal in demanding environments. Constructed from high-quality stainless steel, it offers exceptional resistance to corrosion and ensures long-term reliability. Featuring an automatic float switch and an integrated handle, this pump is engineered for ease of use, portability, and dependable performance in sump pits and flooded areas.

Technical Specifications

Operation Mode

Automatic • Submersible

Key Features

- Integrated float switch for automatic water level control
- Corrosion-resistant stainless steel housing
- Portable design with integrated handle
- Debris-filtering base design

Material

Stainless Steel

Applications

Suitable Environments

Sump Pits, Basements, Flooded Areas, Waterlogged Environments
