

Stainless Steel Water Filter Dispenser

This water filter dispenser is constructed from durable stainless steel for long-lasting performance and corrosion resistance. Its vertical design is suitable for various environments, and it features a swivel spout and manual control valve.

Product Overview

High-Performance Filtration

The ES2 water filter dispenser is engineered for reliable and efficient water purification in professional environments. Constructed from durable, corrosion-resistant stainless steel, this unit ensures long-lasting performance and hygiene. Its compact, vertical design allows for versatile installation options, while the swivel spout and manual control valve provide precise, convenient water access.

Physical Characteristics

Material	Stainless Steel
Form Factor	Vertical

Features

Key Features

- Corrosion-resistant construction
- Swivel spout for flexible access
- Manual control valve for flow regulation
- Compact vertical design

Application

Suitable Environments	Residential, Commercial
