

Standard Street Motorcycle

This motorcycle is designed for street use. It features a standard riding position, a single round headlight, and a two-piece seat.

Overview

Versatile Standard Street Motorcycle

This standard street motorcycle is designed for reliability and daily utility, offering a balanced riding experience for professional and personal use. Featuring a classic aesthetic with chrome accents and a comfortable, upright riding position, this bike is built for ease of handling in urban environments. It comes fully equipped with practical additions like a small windscreen and a rear luggage rack, making it a highly functional choice for commuting and light transport needs.
