

# Standing Electric Fan with Multiple Oscillation Modes

This standing electric fan provides optimal air circulation with its multiple oscillation systems. It features 8-speed settings, a 7.5-hour timer, and 3 wind modes: sleep, standard, and natural.

## Product Overview

### Versatile Standing Electric Fan

The ZF1605R is a high-performance standing electric fan engineered for optimal indoor air circulation in professional or residential environments. It features advanced oscillation capabilities, including figure-8 and cross-oscillation patterns, ensuring comprehensive airflow coverage. With customizable speed settings, multiple wind modes, and an integrated remote control, this unit offers tailored comfort and ease of use for any setting.

## Technical Specifications

Power Rating Options	45W, 55W
Speed Settings	8
Timer Duration	7.5 hours

## Airflow Modes

### Available Wind Modes

- Sleep Mode
- Standard Mode
- Natural Mode

## Oscillation Systems

### Oscillation Patterns

System Type	Movement Description
Standard	Left-Right
Figure-8	Elliptical
Cross Oscillation	Left-Right, Up-Down, Elliptical

## Convenience Features

### Control Method

Remote Control
