

Steam Floor Mop for Hard Surfaces

This steam mop is designed for efficient and hygienic floor cleaning on various hard surfaces. It utilizes steam to remove dirt and grime, sanitizing the floor without harsh chemicals.

Product Overview

Professional Steam Cleaning Efficiency

This steam mop is engineered for high-performance, hygienic cleaning across various sealed hard floor surfaces. By utilizing high-temperature steam, it effectively sanitizes floors and removes grime without the requirement for harsh chemical cleaners. Designed with a lightweight frame and agile swivel head, it offers professional-grade maneuverability for commercial or residential floor maintenance.

Technical Specifications

Suitable Surfaces	Sealed Hardwood, Tile, Laminate
Cleaning Method	High-temperature steam sanitization
Mop Head Material	Absorbent Microfiber

Design Features

Maneuverability Features

- Lightweight construction
- Swivel head design
- Rapid-heat water tank

Hygiene Performance

Chemical-Free • Bacteria-Killing • Hygienic
