

Steam Generator Iron with Cork Handle

This steam generator iron is designed for efficient ironing. It features a separate base unit with a water tank and a temperature control knob.

Product Overview

Professional Steam Performance

This steam generator iron is engineered for high-efficiency garment care in demanding environments. Featuring a ergonomic cork handle for extended comfort, the system pairs a high-capacity base unit with a precision-designed iron. It provides consistent steam output to tackle stubborn wrinkles quickly while maintaining temperature control for diverse fabric types.
