

Steam Generator Iron with Separate Base

This steam generator iron uses a separate base to generate high-pressure steam for efficient wrinkle removal. The iron features a temperature control and a durable soleplate for smooth gliding.

Product Overview

Professional Steam Performance

This steam generator iron combines a high-capacity base unit with a precision-engineered iron to deliver consistent steam pressure for demanding laundry tasks. Featuring an ergonomic cork-handle design for comfort, it ensures prolonged usage without fatigue. The integrated chrome soleplate provides smooth gliding performance, making it an ideal solution for commercial and high-volume garment care environments.
