

Steam Mop

This steam mop is designed to sanitize and clean hard floor surfaces using steam. It features a water tank, power buttons, and a mop head for cleaning floors.

Product Overview

High-Efficiency Steam Cleaning Solution

This professional-grade steam mop is engineered to provide deep cleaning and sanitization for a variety of hard floor surfaces. Its ergonomic metallic handle and intuitive control interface make it a reliable tool for maintenance tasks. By utilizing high-temperature steam, the device effectively lifts dirt and sanitizes floors without the need for harsh chemical cleaners.
