

Steam Station Iron with Separate Water Tank

This steam station iron is designed for efficient and effective garment care. It features a separate water tank for continuous steam generation and adjustable temperature settings for various fabric types.

Product Overview

Professional Garment Care

The Steam Station (KBS-11) is a high-performance household electric iron engineered for efficient and effective garment care. Featuring a large separate water tank, it ensures consistent, continuous steam generation for removing stubborn wrinkles with ease. Its ergonomic design and digital interface offer users precise control over temperature and steam levels, making it an essential tool for maintaining high-quality fabric standards.

Key Features

Main Features

- Separate water tank for continuous steam
- Digital control panel
- Adjustable temperature settings
- Safety automatic shut-off function
- Ergonomic handle design

Technical Specifications

Model ID	KBS-11
Category	Household electric iron

Compliance & Certification

Safety Features	Auto shut-off, Digital monitoring
