

Steel Blade Digging Spade with Wooden Handle

This spade is designed for digging and planting tasks. It features a steel blade for efficient soil penetration and a wooden handle for a comfortable grip.

Product Overview

Professional Grade Digging Spade

This robust spade is engineered for high-performance digging and planting tasks in professional gardening, landscaping, and construction environments. It features a high-strength steel blade treated specifically for corrosion resistance, ensuring longevity in various soil conditions. The ergonomically designed wooden handle provides a comfortable grip and superior leverage, helping to reduce operator strain during intensive work.

Technical Specifications

Model ID	CST1-2SL
Blade Material	Steel
Handle Material	Wood

Features

Primary Applications	Gardening, Landscaping, Construction
Corrosion Resistant	Yes
