Product Overview

Professional Steel EMT Connector

This Steel EMT Set Screw Connector is engineered for reliable electrical installations, providing a secure connection between EMT conduit and electrical boxes or enclosures. Crafted from high-quality steel, it offers excellent durability and corrosion resistance for long-term performance. The design features a smooth inner layer and an integrated set screw mechanism, ensuring both ease of installation and a stable, grounded electrical path for commercial and residential projects.

Technical Details

Material	Zinc Die Cast/Steel
Color	White
Key Features	Corrosion Resistant, Smooth Inner Layer, Set Screw Mechanism

Usage

Primary Application	Connect EMT tubes to a box or enclosure
