Product Overview

Professional Grade Eye Screws

These steel eye screws are engineered for creating secure, reliable attachment points in wood and various other materials. Featuring a robust closed-loop design, they are ideal for connecting ropes, cables, chains, and other hardware securely. The threaded shaft ensures straightforward installation, while available finishes like zinc-plated and galvanized steel provide essential corrosion resistance for diverse environments.

Technical Specifications

Fastener Type	Eye Screw with Closed Loop
Thread Type	Self-tapping

Material & Finish

Material	Steel
Available Finishes	Zinc-plated, Galvanized

Application

Primary Uses

- Securing ropes
- Attaching cables
- Connecting chains
- General hardware fastening

Suitable Surfaces

Wood • General Materials
