

Steel Handcuffs with Double-Locking Mechanism

These steel handcuffs are designed for security and restraint purposes. They feature a double-locking mechanism for enhanced safety and include two keys.

Product Overview

Professional Security Restraints

These high-quality steel handcuffs are engineered for reliability and security in demanding environments. Featuring a robust double-locking mechanism, they provide enhanced safety and prevent over-tightening during use. Designed for law enforcement and authorized security personnel, each unit is individually inspected to ensure durability and consistent performance under rigorous conditions.
