Product Overview

Professional Grade Steel Shackles

These professional-grade steel shackles feature a reliable screw pin design for secure fastening in demanding lifting and rigging environments. Available in both carbon steel and high-strength stainless steel, they provide the durability required for construction, marine, and industrial applications. Their robust construction ensures a safe and stable connection point for chains, ropes, and various lifting accessories.

Technical Specifications

Finish

Galvanized • Corrosion Resistant

Design Configurations

- G2130 Standard
- D-Shaped
- WILL85T Rated

Material Options

Carbon Steel, Stainless Steel

Closure Type

Screw Pin

Industry Applications

Suitable Environments

- Construction
- Marine Industry
- General Industrial Lifting
- Rigging Operations
