

Steel Shovel Head Replacement

This shovel head is made from high-quality steel for strength and durability. The curved blade facilitates efficient soil penetration and material handling in gardening, construction, and agriculture.

Product Overview

Professional Grade Replacement Shovel Head

This durable shovel head is engineered for demanding digging and landscaping tasks in construction, agriculture, and gardening sectors. Constructed from high-quality steel, it offers exceptional strength and long-term durability under heavy use. The design features a sharp, curved blade profile optimized for efficient soil penetration and material handling. It is fully compatible with standard handle sizes, allowing for seamless integration and quick replacement.

Technical Specifications

Design Features

- Sharp, curved blade profile
- Optimized for material handling
- High-strength construction
- Standard handle compatibility

Material	High-quality steel
