

Steel Tie Rod End for Auto Steering Systems

This tie rod end connects the steering linkage to the steering knuckle, allowing the wheels to turn. It is made of steel and has a threaded shank for adjustment and a grease fitting for lubrication.

Product Overview

Precision Steering Component

This high-grade steel tie rod end serves as a vital link between the steering linkage and the wheel assembly. Engineered for durability and reliable motion transfer, it is essential for maintaining precise steering control and safe vehicle operation. The component features a threaded shank design for easy adjustment during alignment and an integrated grease fitting for routine maintenance and long-term performance.
