

Steel Wire Armored Cable

This steel wire cable features a steel wire armor layer for enhanced mechanical protection. It is suitable for communication applications where durability and signal integrity are critical.

Product Overview

Rugged Armored Connectivity

This Steel Wire Armored Cable is engineered for demanding environments requiring superior mechanical protection and long-term durability. It features a robust steel wire armor layer that effectively guards against rodent damage and physical impacts. Designed with moisture-resistant materials and specialized fiber control, it ensures signal integrity in both duct and buried installations.

Technical Specifications

Recommended Applications

- Duct installation
- Buried installation

Key Features

Steel Wire Armored, Rodent Resistant, Water Blocking, Gel-free, Excellent Tensile Strength, Crush Resistant

Cable Construction

Structural Components

Component	Function
Outer Sheath	Environmental protection
Steel Wire	Mechanical strength and armor
Inner Sheath	Core protection
Loose Tube	Fiber containment
Central Strength Member	Axial support
