Product Overview

High-Quality Steering Rack End

This steering rack end is a critical component designed to ensure precise directional control by connecting the steering rack to the tie rod. Constructed from a robust combination of steel and rubber, it offers exceptional durability and resistance to the rigors of daily vehicle operation. Its high-strength design is engineered to maintain alignment, enhance handling responsiveness, and provide long-lasting safety performance for automotive steering systems.

Technical Specifications

OEM Reference	56540-0U500
Materials	Steel, Rubber

Compatibility

Compatible Brand	Hyundai
