

Step-Through Frame Tandem Bicycle

This tandem bicycle is designed for two riders, each with their own saddle and pedals. The step-through frame is made of steel and allows for easy mounting and dismounting.

Overview

Designed for Comfort and Accessibility

This step-through tandem bicycle is engineered for easy mounting and dismounting, making it an ideal choice for riders of all ages and abilities. Built with a durable steel frame, it provides exceptional stability and longevity for shared cycling experiences. The upright handlebar design ensures a comfortable riding posture, while the dual-saddle and dual-pedal system allows both riders to contribute to the journey.
