

Stepped Cone Drill Bit

This step drill bit is designed for drilling multiple hole sizes in thin materials with a single bit. The stepped design allows for precise and efficient drilling, eliminating the need for frequent bit changes.

Product Overview

Versatile Multi-Diameter Drilling

This high-performance stepped cone drill bit is designed for efficient, multi-size drilling in thin materials like steel, aluminum, plastic, and wood. Engineered with a self-centering X-shaped split point and a titanium coating, it reduces friction while significantly increasing cutting speed and longevity. The universal hex shank ensures secure compatibility with standard drill chucks, making it an essential tool for electrical and plumbing professional applications.

Technical Specifications

| | |
|-----------------------|--|
| Construction Material | High-Speed Steel (HSS) with Titanium coating |
| Shank Size | 6.35 mm |
| Step Height | 5 mm |
| Flute Configuration | 2 Flute Spiral |

Performance Features

Cutting Performance

| | |
|---------------------------------|----------------------------------|
| 4 mm Minimum Diameter | 20 mm Maximum Diameter |
|---------------------------------|----------------------------------|

| | |
|------------------|---|
| Key Capabilities | Self-centering, Titanium Coated, Burr-free drilling, X-shaped split point |
|------------------|---|

Compatibility

Compatible Materials

- Steel
- Aluminum
- Plastic
- Wood

Industrial Applications

Electrical • Plumbing • Sheet Metal
