

Stereo Zoom Microscope

This zoom microscope features a sharp image, special structure, and multifunctionality. Its modular design includes a main body, stand, eyepiece, auxiliary lens, and various accessories to satisfy different demands.

Product Overview

Professional Stereo Zoom Microscope

The XTZ binocular stereo zoom microscope is a high-precision optical instrument designed for the detailed observation of three-dimensional specimens. Featuring a flexible zoom ratio and adjustable magnification range, it provides clear, immersive viewing for industrial inspection, research, and educational purposes. Its sturdy track stand ensures stability, while the ergonomic binocular design facilitates comfortable extended use.
