

Strut Bumper and Bellows Kit for HONDA HR-V (GH)

This kit includes a strut bumper and bellows designed for the HONDA HR-V (GH) model. The strut bumper is made of high-quality polyurethane to provide excellent cushioning and durability, while the bellows are made of flexible rubber to protect the strut from dirt and debris.

Overview

Premium Suspension Protection Kit

This Strut Bumper and Bellows Kit is engineered to match original equipment parameters, ensuring optimal performance and durability for the suspension system. Designed with high-quality polyurethane and flexible rubber or TPV, the kit offers excellent resistance to wear, tensile stress, and extreme temperatures as low as -40°C. Each component undergoes rigorous fatigue testing to withstand 200,000 impacts, providing reliable protection for your shock absorbers for at least 18 months or 100,000 kilometers.

Product Details

High-quality polyurethane bumper and flexible rubber bellows kit for Honda HR-V.

Certifications

ISO • IATF

Product Name	Strut Bumper and Bellows Kit
Vehicle Compatibility	HONDA HR-V (GH)
Installation Position	Suspension system

Technical Specifications

Fatigue Test Durability

200000 cycles

Impact Cycles

Materials Used

- High-quality polyurethane (Buffer block)
- Natural rubber or TPV (Dust cover)

Minimum Operating Temperature

-40 °C

Shelf Life

3 years

Commercial Terms

Warranty

1 year

Minimum Order Quantity

100 PCS

Accepted Terms

FOB, CIF, EXW

Packaging Type

Neutral Packing
