

Submersible Bilge Pump for Marine Applications

This submersible bilge pump is designed for efficient water removal in marine and other applications. The compact and durable pump features a robust motor for reliable performance.

Product Overview

Reliable Marine Water Management

The BL-25 submersible bilge pump is engineered for efficient water removal in demanding marine environments. Designed for durability and consistent performance, this compact unit is ideal for bilges, livewells, and areas prone to water accumulation. Its corrosion-resistant construction ensures long-term reliability, while the standard outlet fitting allows for straightforward installation and maintenance.

Technical Specifications

Build Quality

Corrosion-Resistant • Submersible • Compact Design

Model

BL-25

Applications

Bilge, Livewell, Marine Water Removal

Installation & Use

Maintenance

- Simple installation process
- Standard outlet fitting for easy hose connection
- Designed for easy maintenance access
