

Submersible Deep Well Pump with Stainless Steel Body

This submersible deep well pump is designed for efficient water extraction from deep wells. Constructed with a durable stainless steel body, it ensures longevity and resistance to corrosion.

Overview

High-Efficiency Submersible Deep Well Pump

This submersible deep well pump is engineered with advanced Italian technology and a unique separate structure, ensuring high efficiency and durability. Constructed from superior stainless steel and high-abrasive resistant industrial plastic, it is designed for long-term reliability in demanding environments. With an IP68 protection class and a maximum operating depth of 100 meters, this pump provides a robust solution for water extraction and irrigation needs.

Operating Limits

pH Range	6.5 - 8.5
Max Fluid Temperature	40 °C
Max Ambient Temperature	75 °C
Max Operating Depth	100 m

Technical Specifications

Protection Class	IP68
Insulation Class	I

Key Features

Key Features

- Italian technology design
- High overload capacity
- Food-grade mechanical oil
- Automatic protection device
- High sand resistance

Construction Materials	Stainless Steel, Industrial Plastic
