

Submersible Deep Well Screw Water Pump

The QGD/QG series submersible deep well screw water pump efficiently extracts water from deep wells. Designed for domestic, agricultural, and industrial use, it ensures reliable water supply.

Product Overview

High-Efficiency Deep Well Extraction

The QGD/QG series submersible deep well screw water pump is engineered for reliable water extraction in domestic, agricultural, and industrial settings. Its advanced screw mechanism ensures effective fluid transport while maintaining quiet, submersible operation. Built with high-quality, corrosion-resistant materials, this compact pump is designed to withstand the rigors of long-term use in narrow wells.

Technical Specifications

Pump Mechanism	Screw pump
Installation	Submersible
Compatible Water Type	Clean water

Operating Guidelines

Origin

Made in China

Safety Warnings

Do not dry run, Use within rated voltage/current, For clean water only
