

Submersible Drainage Water Pump with Float Switch

This submersible water pump is designed for drainage and irrigation. It features durable construction with a stainless steel upper housing and a robust base.

Product Overview

Submersible Drainage Water Pump

This high-performance submersible water pump is expertly engineered for efficient drainage and irrigation tasks. Featuring a durable stainless steel upper housing and a robust base, it ensures long-term reliability in demanding environments. The integrated float switch provides seamless automatic operation, making it an ideal solution for flooded areas, pond maintenance, and general water transfer.

Technical Specifications

Applications

- Flood water removal
- Pond emptying
- Agricultural irrigation
- General water transfer

Construction

Stainless Steel • Reinforced Base

Key Features

Automatic Float Switch, Stainless Steel Housing, Portable Handle, Threaded Outlet, Submersible Design
