

Submersible Drainage Water Pump with Float Switch

This submersible water pump is designed for drainage and irrigation applications. It features a float switch for automatic operation, a robust plastic housing, and a multi-stage impeller system for efficient water transfer.

Product Overview

Efficient Water Management

This submersible drainage water pump is engineered for reliable performance in drainage and irrigation tasks. It features an integrated float switch for fully automatic operation and a robust plastic housing for durability. Its multi-stage impeller system ensures efficient water transfer, making it an ideal choice for clearing cellars, pools, or ponds.

Technical Specifications

Operation Features

- Automatic float switch
- Multi-stage impeller system
- Includes hose adapter
- Ergonomic carrying handle

Application Compatibility

Drainage, Irrigation, Clean Water, Slightly Dirty Water

Construction

Design Type

Submersible • Portable

Housing Material

Robust plastic
