

Submersible Garden Sewage Pump with Float Switch

This submersible sewage pump is designed for garden and domestic wastewater applications. It is suitable for pumping sewage, drainage, and greywater from various sources.

Overview

Reliable Garden Sewage Solution

This submersible sewage pump is engineered for efficient water management in domestic and garden environments. Its robust stainless steel construction ensures long-term durability and resistance against corrosion in wastewater applications. Equipped with an integrated automatic float switch, the unit provides reliable, hands-free operation for drainage and greywater management.

Technical Specifications

Performance Metrics

12 m³/h

Max Flow Rate

7 m

Max Head

2800 r/min

Speed

Electrical Characteristics

Parameter	Value
Voltage	230 V
Frequency	50 Hz
Power Output	1.25 kW
Ingress Protection	IPX8

Features

Key Features

- Automatic float switch for reliable operation
- Durable stainless steel construction
- Submersible design
- Suitable for sewage, drainage, and greywater
