

# Submersible Garden Wastewater Pump with Float Switch

This submersible pump is designed for garden and wastewater applications. It is equipped with a stainless steel body and float switch for automated operation, making it suitable for handling both clean and dirty water with solid particles.

## Product Overview

### Professional Submersible Wastewater Pump

This submersible pump is engineered for efficient wastewater and garden water management. Featuring a robust stainless steel housing and an integrated automatic float switch, it provides reliable performance in both clean and dirty water environments. It is perfectly suited for heavy-duty drainage, irrigation, and general water transfer tasks where solids handling is required.

## Performance Metrics

### Key Performance Indicators

**550 W**

Power Output

**10.5 m<sup>3</sup>/h**

Max Flow Rate

**8 m**

Max Head

**2900 r.p.m**

Speed

## Electrical Specifications

### Electrical Characteristics

Parameter	Value
Voltage	230V
Frequency	50 Hz
Rated Current	2 A
Ingress Protection	IPX8
Insulation Class	Class F

## Design and Utility

### Build Features

Stainless Steel Body, Automatic Float Switch, Carry Handle, Submersible Design

## Compliance and Quality

### Certifications

CE Certified
